26" Widescreen Flat TV™

26PF9966/37

Superior picture in a stylish design

This stylish LCD TV features Philips Pixel Plus technology to present breathtaking nature pictures and astounding theatre-like acoustics sound with uncanny depth and clarity. This LCD TV is designed with a fusion of sensual curves integrated into an ultra-slim profile with exquisite detailing. Multiple Picture-in-Picture modes allow simultaneously watching two video sources either Picture-in-Picture or side by side.

Breathtaking natural pictures
- *New generation LCD Panel for better viewing experience*
- *Pixel Plus technology delivers more vivid details*
- *Active Control™ Plus+ optimizes pictures, whatever the source*
- *Motion adaptive de-interlacing to deliver stable and razor sharp images*

Superb sound reproduction
- *Virtual Dolby® Surround sound needs no extra rear speakers*

Multi-purpose convenience
- *FM Radio with 40 preset stations*
- *PC Monitor (VGA and HDMI)*
- *HDTV Monitor for the latest and best television signal available*
- *Multiple PIP modes for simultaneously viewing two video sources*

Stylish Design
- *Simple and elegant*
- *Fusion of sensual curves*
- *Ultra-slim profile*

Digital Connectivity
- *HDMI with HDCP to enjoy high-definition audio/video in a single cable*

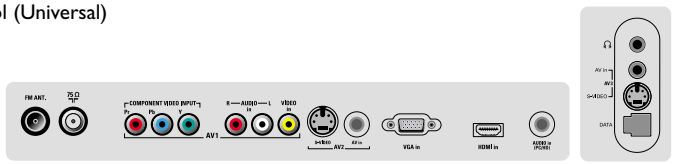
Box Dimensions (WxHxD) : 34 x 23.6 x 12 (inch)

UPC : 0 37849 94830 9



Rear AV Inputs/Outputs

Product highlights

New generation LCD Panel
New generation LCD Panel offers superior entertainment with a wider viewing angle, a faster response time and natural brilliant colors. Minimal 'color shift' i.e. uniform natural colors when viewed from different angles, is a key picture performance factor for LCD TVs.

Pixel Plus™
Pixel Plus™ uses the power of the Pixel Plus processor to enhance every single pixel displayed. The result is razor sharp pixels with incredible detail and depth, every time.

Digital Crystal Clear™
A unique package of picture innovations including 3D Combfilter, Dynamic Contrast., Color Enhancement, and Luminance Transient Improvement resulting in more contrast, natural colors and a high level of detail.

HDTV with HDMI
HDMI is the first industry-supported, uncompressed, all-digital audio/video interface. HDMI makes direct digital-to-digital connection possible. It eliminates the digital-to-analog conversion in order to deliver a completely pixel-perfect image in the highest possible resolution without any deterioration. HDMI is fully backward-compatible with DVI for DTVs and Digital PC. HDMI will display video received from existing DVI-equipped products.

Active Control™ Plus+
Active Control Plus+ delivers the best picture setting, any time, any source. The incoming signal is automatically analyzed and key picture settings are adjusted; sharpness, noise reduction, color and contrast. The ambient light sensor adjusts the settings according to the viewing conditions in the room.

Motion adaptive de-interlacing
A smart de-interlacing algorithm which is able to detect the type of video source such as Still Picture, Motion Picture or Film and automatically optimize the de-interlacing process with Spatial, Temporal or Film mode de-interlacing to deliver razor sharp and stable images at all time.

Virtual Dolby® Surround
Enjoy enhanced cinema surround sound effect without the need for rear speakers.

FM Radio
Listen to all your favorite radio channels (40 presets).

Multiple PIP
Multiple Picture-in-Picture modes allows simultaneously watching 2 video sources either Picture-in-Picture or side by side.
